Alla P Rozova, PA Mar 16, 8:56 AM

Your urinalysis shows normal results with no signs of infection, blood, protein, or other abnormalities. The microscopic examination found no white blood cells, red blood cells, bacteria, or other concerning elements. Your PSA level of 0.3 ng/mL is within the normal range for a 47-year-old male.

If you have questions and would like to discuss in detail, please, call the office and schedule appointment with your PCP.

Alla Rozova PA-C

Results

Performed at: 01 - Labcorp San Diego
13112 Evening Creek Dr So Ste 200, San Diego, CA 921284108
Lab Director: Earle Collum, Jr MD, Phone: 8586683700

PSA
Normal range: 0.0 - 4.0 ng/mL

Roche ECLIA methodology.

According to the American Urological Association, Serum PSA should decrease and remain at undetectable levels after radical prostatectomy. The AUA defines biochemical recurrence as an initial PSA value 0.2 ng/mL or greater followed by a subsequent confirmatory PSA value 0.2 ng/mL or greater.

Values obtained with different assay methods or kits cannot be used interchangeably. Results cannot be interpreted as absolute evidence of the presence or absence of malignant disease.

Additional Information

Authorizing provider: Alla P Rozova, PA
Collection date: Mar 13, 2026 11:16 AM
Specimens: Blood (Blood, from Venipuncture)

Result date: Mar 14, 2026 5:08 AM

Result status: Final

Resulting lab:

LABCORP LAB

358 South Main Street

Burlington NC 27215
